## 11 461 H0 Sandbox system

Sand is one of the operating materials that every locomotive needs. To increase the friction when starting and braking, especially in difficult weather conditions, sand from the locomotive's sandbox is sprinkled between the wheel and rail via pipes. The sand, as well as coal and water, was refilled in the depots. The Auhagen model is based on a standardised construction that was and still is used, for example in the depots in Berlin-Schöneeweide and Lutherstadt Wittenberg. The model is intricately detailed. You can choose how to position the storage tank next to the tower. It is connected by a flexible hose. Elevations are included for use with bedded tracks.

Authentic historical model  
Available from 09/2020  
RRP 29.90 EUR

80 x 40 x 141 mm / 37 x 28 x 55 mm

**41 659 H0  
Loader T170**

The self-propelled T170 loader was produced in the GDR from the mid-1950s and was used on farms and building sites. Powered by its own drive, it could "speed" along at just 3.5 km/h, which is also why it could be towed at up to 20 km/h. The 6.3 m long boom consisting of two tubes was raised and lowered with ropes. With a 10 PS engine, later upgraded to 13 PS, it could lift up to 0.8 t.

Our intricate kit is an exact replica of the real-life vehicle. The model can be rotated 360° on a chassis equipped with a steerable front axle. The boom, which can be tilted to different angles, can be fitted with a grapple or a manure fork.

With authentic imprint and tyres.

Buffer**

Filigree kit. Replica of a buffer with rail profiles bolted with gusset plates. For placing on the tracks. The two finely detailed models are each fitted with an Sh0 signal and track-closure signal board.

Can be used from Era II onwards.

2 pieces

**Available from 09/2020**  
**RRP 8.90 EUR**

24 x 29 x 18 mm

**41 664 H0  
Curved buffer**

Filigree kit. Replica of a buffer with curved rail profile and buffer rods. For putting at the end of the tracks. The finely detailed models feature built-on buffers. Each model is fitted with a Sh0 signal and track-closure signal board.

Can be used from Era I onwards.

2 pieces

**Available from 09/2020**  
**RRP 11.90 EUR**

54 x 30 x 21 mm

**41 665 H0  
Timber buffer**

Ready-made. Replica of a buffer with timber planks buried vertically in a box shape. For putting at the end of the tracks. The very finely textured timber planks featured at the model are laser-cut from real wood. The box filling is planted with greenery, and the model includes an Sh0 signal and track-closure signal board. Can be used from Era I onwards.

### 11 460 H0 Car workshop

This basic model from our modular system includes an extensive range of accessories for designing a small car workshop. The gate can be installed in an open position, allowing a good view of the extensive interior furnishings such as workbenches with drawers and vices, steel cabinets and shelves, a compressor with accessories, individual tools and much more. The additional interior walls and the floor are made from realistic-looking printed card. One thing that is sure to catch the eye is the moveable scissor lift (by VEB Hebebühnen Lunzenau) with a maximum load capacity of 2 t. The access ramp in the outside area, featuring a track width that can be built in different sizes, is available for underbody maintenance. Several drums, including some with dents, along with lubricants and maintenance products, give the impression of a model workshop in good demand.

Available from 07/2020  
RRP 49.90 EUR

### 41 666 H0 Workshop equipment

Use this accessory set to furnish workshop areas, such as in industrial buildings, with realistic-looking equipment. Workbenches with movable drawers and vices as well as cabinets with doors that can be mounted open or closed are complemented by two compressors with accessories and fire extinguishers. Euro pallets are included for expandable heavy-duty shelving.

Available from 07/2020  
RRP 19.90 EUR

41 657

Hand pattern model

**41 657 H0  
Multicar M22 with water tank**

Water tank vehicle kit based on the Multicar M22. The original 1600-litre tank is filled with a suction hose, which is stored and transported around the tank when not in use. A hose reel and the motor-hydraulic pump are housed on the rear side of the authentic-looking printed container, where they are protected from the weather. With realistic tyres, pivoting front axle and a printed sheet containing national and international number plates.

**Available from 07/2020  
RRP 23.90 EUR**

**39 x 15 x 22 mm**

**41 658 H0  
Vehicle accessories**

The cargo and other accessories are perfect for designing building sites. The Multicar M22 with flat bed No. 41 644 and trailer No. 41 642 can now be equipped with sand cargo, as can dumper No. 41 641 from the Auhagen vehicle range. Tipped sand piles in various sizes as well as buckets, shovels, brooms, a wheel barrow and a grout box compete the building site scene. The raised panel walls can be used for coal trade vehicles, for example. The parts can be inserted individually, making their use flexible.

### 41 662 H0 Telephone boxes and postboxes

In today's world of mobile telephony, it's hard to imagine that you once had to queue to make a telephone call. A sign saying "keep it short" made absolute sense. The 4 telephone boxes are complemented by 2 pillar boxes and 4 wall-mounted postboxes.  
**Available from 07/2020**  
**RRP 9.50 EUR**

12 x 12 x 25 mm

41 660

### 41 660 H0 Heavy-duty shelving and pallets

The expandable industrial shelving can be built in different variants. The shelves can be added as needed. The 24 Euro pallets in two versions and 4 metal boxes can be used to complete the design of your layout. Shelf with 9 stands and 27 shelves.  
**Available from 03/2020**  
**RRP 14.90 EUR**

136 x 12 x 44 mm

41 667

### 41 667 H0 Pallets

The Euro pallets in H0 can be used to load vehicles, create loading scenes or build large pallet warehouses. A pack contains 80 "standard" pallets and 16 pallets with stacking frames, each in two different versions (new and used pallets).  
**Available from 03/2020**  
**RRP 14.50 EUR**

### 41 661 H0 Street lights

Replicas. These RSL1 lights were a part of the street landscape in the GDR from the 1960s onwards. Mostly mounted on concrete poles, they still illuminate streets and squares in many towns and municipalities today. The round disc lights, called Rundscheibenleuchte in German, get their name from the discs made of curved textured glass held by metal brackets. These replicas are ideal for designing residential areas, parks or streets.  
8 pole luminaires height 64 mm  
**Available from 07/2020**  
**RRP 13.90 EUR**

42 657

### 42 657 H0/TT Pavement slabs with accessories

Our pavement slabs go with the kerbs and gutters No. 42 656. Special corner pieces for different radii allow you to easily design authentic-looking pavements. Slabs with fixtures for the included storm drain and manhole cover, as well as perforated elements for the custom fitting of street lighting, complement the modular system. Can also be combined with items such as tree grilles No. 42 658 and young trees No. 70 950 / 70 951.  
Total length of straight pieces 828 mm  
**Available from 03/2020**  
**RRP 16.90 EUR**

42 657

13 346

### 13 346 TT Post office

The post office was built at the turn of the century, but it has undergone many changes and is now fit for the modern postal service. New features in keeping with the period include an extension for the porter and a loading ramp in the yard that is protected by a lean-to roof. The four transport carts can be loaded with parcels. Featuring wall lamps, postboxes and a flagpole with flag, the street facade also looks impressive. Four telephone boxes are included and can also be positioned in the surrounding streets. The Postamt lettering and the window grilles are made from sturdy laser-cut card.  
Available from 07/2020  
RRP 27.90 EUR

143 x 137 x 98 mm

43 665

### 43 665 TT Enclosure

Brick walls are a stylish way to make a boundary around a plot of land. Ample wall segments are provided in various combinations, along with four individual columns, so that even larger model yards can be separated. Capstones for the columns are included. The large gate for vehicles and the small one for pedestrians are made from sturdy laser-cut card.  
Length 800 mm  
Gate width 40 mm and 10 mm  
Available from 03/2020  
RRP 19.90 EUR

**43 663 TT**  
**Electric postal trolley with trailer**

Electric trolleys, which also had trailers, were used for short transport tasks such as on the premises of a railway post office. Letters and parcels were stored in the strip-wood box body to protect them from the wind and weather. The models are in the characteristic yellow of the German postal service and have grey roofs and black chassis. The spare tyre on the trailer completes the detailed kit.  
Electric trolley 27 x 10 x 17 mm  
Trailer 27 x 10 x 17 mm
